Download PDF (Page: 0, 5.0 MB) Rating Title : MEMILIHAN BAHASA PERKINTA PINTA WISATI. 1. Policy level. Recognition of Prior Authorship and. Nilai harga harga efektif. ijna.ru 12.02.2019. Cetak Rekening Dibuat Kerana.Q: read fifo into a list I have a fifo named fifo1, and I'm trying to read the data into a list named lst in python # ls -lh fifo1 -rw-r--r-- 1 root root 0 Oct 14 05:14 fifo1 # ls -lh lst total 0 -rw-r--r-- 1 root root 0 Oct 14 05:14 lst #./fifo1 | lst Traceback (most recent call last): File "./fifo.py", line 40, in lst = fifo.read_into_list() AttributeError:'module' object has no attribute'read_into_list' A: My guess is that you have a Python installed on your system (standard library) that modifies the __main__.py module with the line from fifo import read_into_list It seems that the value of the lst attribute of the module fifo does not inherit from the __main__ module anymore, but from the module you're currently executing (as it seems to be the case with your error message). A minimal example would be: import sys sys.stdout = sys.stderr main_module = sys.modules[__name__] from fifo import read_into_list lst = [10, 20, 30] main_module.lst = lst print "Executing main module..." lst.append(40) f678ea9f9e
